

Postdoctoral Research Scientist Position in Climate Dynamics at the University of Chicago

The Department of the Geophysical Sciences at the University of Chicago invites applications for a Postdoctoral Research Scientist position, with specific interest in the atmospheric general circulation and climate dynamics. The successful applicant will work under the supervision of Prof. Tiffany Shaw. The ideal candidate will be skilled in both numerical modeling and the analysis of models and observational data.

Candidates should have recently completed their PhD, or should expect to complete their requirements by December 2016, in atmospheric science or a related field.

Appointments will be for 1-year initially, with continuation contingent upon progress; renewal beyond two years is contingent on funding.

Position will remain open for at least 30 days and until the position is filled.

Applicants should send a curriculum vitae, a statement of research interests, and names and addresses of 3 referees to Tiffany Shaw (tas1@uchicago.edu).

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, age, protected veteran status or status as an individual with disability. The University of Chicago is an Affirmative Action/Equal Opportunity/Disabled/Veterans Employer.
